REMARKS

Applicant thanks the Examiner for consideration of the subject patent application. In the office action mailed June 1, 2005, Claims 1-42 were pending, and made subject to restriction requirement under 35 U.S.C. § 1.21. Particularly, the Examiner indicated the existence of two patentably distinct inventions in the claims as follows: 1) Invention I constituting Claims 1-24, drawn to a high pressure system, classified in class 425, subclass 77; and 2) Invention II constituting Claims 25-42, drawn to a method of growing crystalline bodies at high pressure, classified in class 264, subclass 446.

By this election, Applicant elects Invention I constituting Claims 1-24 drawn to a high pressure system. Therefore, pursuant to the present election of Invention I, Claims 1-24 remain pending for consideration in the present application, and Claims 25-42 are withdrawn.
